Insurance Basics for Homeowners

What you need to know before you buy or own a home!

1. **Full Replacement Coverage vs Actual Cash Value Coverage (ACV)** | Full replacement coverage means an insurance carrier will pay out fully minus any deductibles compared to ACV coverage which will depreciate the payout.
2. **Insurance Bundling** | Maximize discounts by keeping your home & auto insurance with the same insurance company.
3. **Deductibles** | This is what you pay before an insurance company will pay out on a claim.
4. **Roof Condition** | In Oklahoma roof claims are the most common claim among homeowners. Before buying a home it's important to know the condition and age of a roof.
5. **Filing a claim** | When you need to file a claim, you would think to call the claim department. **DO NOT DO THIS!** Always call your agent to get their advice before filing a claim. A call to a claims department and even a \$0 paid claim will put a claim on your record which can cause your future premiums to increase.
6. **Home Warranty** | This is coverage that insurance will not cover! This takes care of maintenance issues, such ceiling fans, garage door openers, garbage disposals, etc...
7. **Ask your Insurance Agent questions** | Understanding the ins and outs of insurance coverage is something every homeowner should consider along with the other aspects of home ownership.

Other important things to know...

- Have a working fire extinguisher in your home.
- Take an inventory of everything in your home.
- Check the install date on your smoke alarms as most should be good for 10 yrs.
- Most insurance companies do not cover mold or sewer backup, ask your agent if there is an endorsement option to add coverage for this to your home policy.
